

JOINT MEDIA RELEASE

WindEnergy Conference and Exhibition launched in Singapore to accelerate growth of renewables in Asia-Pacific

Hamburg Messe, DN Media Group and Singapore government agencies form five-year strategic partnership for a series of wind energy conferences and exhibitions

MR No.: 057/25

Hamburg, Germany, 27 November 2025 – DN Media Group AS (RECHARGE), Hamburg Messe und Congress GmbH (HMC), Enterprise Singapore (EnterpriseSG) and the Singapore Tourism Board (STB), have signed a Memorandum of Understanding (MOU) to collaborate on a series of wind energy conferences and exhibitions in Singapore from 2026 to 2029. The signing ceremony was witnessed by the First Mayor of Hamburg, Dr. Peter Tschentscher and Singapore's Ambassador to Germany, Mr Lee Chong Hock. Under the MOU, EnterpriseSG and STB will support RECHARGE and HMC to organise (i) the 2-day **RECHARGE Wind Power Summit Asia-Pacific powered by WindEnergy Hamburg** in Singapore in 2026, and (ii) the flagship 3-day **WindEnergy Asia-Pacific powered by RECHARGE¹** in Singapore in 2027 and 2029.

2 Wind energy stands at an inflection point in Asia-Pacific (APAC), where countries with abundant wind resources such as Australia, India, Japan, the Philippines, South Korea and Vietnam have unveiled wind energy targets and rolled out feasibility studies and auctions. The region is currently the largest wind market with 607.5 gigawatts of wind power installed in 2024². Offshore wind, with its ability to deliver renewable energy on the gigawatt scale, has particularly emerged as a promising technology to meet APAC's growing demand for secure, sustainable and affordable energy. The region is expected to see 50 gigawatts of offshore wind capacity come online by 2034³, accounting for over 60% of new global offshore wind capacity additions.

3 To unlock the full potential of wind power in APAC, coordinated efforts between governments, industry and academia are required to encourage greater dialogue, best practice exchange and collaboration. The WindEnergy Asia-Pacific and RECHARGE Wind Power Summit Singapore events will establish platforms for stakeholders to convene and create opportunities to accelerate the rollout of offshore and onshore wind in APAC and beyond. The events also represent a significant milestone in Singapore's ambition to become the leading offshore wind

¹ WindEnergy Asia-Pacific will alternate with WindEnergy Hamburg, with the former happening every odd year while the latter in the even years.

² Global Offshore Wind Report 2025 by Global Wind Energy Council

³ Global Offshore Wind Report 2025 by Global Wind Energy Council

hub in APAC with industry expertise, thought leadership and trusted partnerships connecting global players with regional capabilities.

4 The MOU was signed today at the RECHARGE Wind Power Summit 2025 in Hamburg, marking WindEnergy's first expansion outside Europe. The partnership will leverage the success and global reach of WindEnergy Hamburg – the world's leading wind industry event organiser with 1,600 exhibitors and 43,000 participants from 100 countries, and RECHARGE – the top global source for renewable energy news and business intelligence. The events will drive APAC's wind industry growth and bring together global and regional companies in the global offshore wind supply chains. Attendees can expect to participate in conferences and trade fairs, plenaries, roundtables, networking sessions as well as site visits to Singapore's leading offshore wind supply chain companies. These activities aim to facilitate business development, policy dialogue and knowledge exchange among global industry leaders, policymakers, financiers, innovators and regional supply chain players.

5 **Mr. Soh Leng Wan, Assistant Managing Director for Manufacturing, Enterprise Singapore** said, "Singapore is committed to leading Asia-Pacific's offshore wind development, which is crucial to the region's clean energy transition. We have been propelling growth of the industry through innovation, standards development, and supply chain enhancements. These events provide us with an additional platform to drive more strategic partnerships with key industry stakeholders. We invite global offshore wind players to join us as we collectively advance the industry across APAC."

6 **Mr. Poh Chi Chuan, Executive Director, Exhibitions & Conferences, Singapore Tourism Board** said, "As a strategic Global-Asia node for business and innovation, Singapore serves as an important gateway for organisations worldwide to access the dynamic Asia-Pacific region. Hosting Singapore's first dedicated wind energy exhibition not only positions Singapore as a leading sustainable urban destination, it also contributes to global sustainability efforts. Our commitment reaffirms Singapore's position as the *World's Best MICE City*. We look forward to welcoming global industry leaders to Singapore, where they will shape the future of offshore wind growth."

7 **Mr. Baard Haugen, CEO DN Media Group** said, "RECHARGE is proud to help power the energy transition in Asia-Pacific by connecting global expertise with regional opportunity. This strategic alignment reflects the strong appeal of Singapore's business events ecosystem, bringing together global leaders and decision-makers for meaningful dialogue that accelerates wind energy growth across the region."

8 **Mr. Heiko M. Stutzinger, CEO Hamburg Messe und Congress GmbH** said, "WindEnergy Asia-Pacific powered by RECHARGE will bring together the best of global and regional expertise, offering unparalleled opportunities for collaboration and business development. Hamburg Messe und Congress GmbH with WindEnergy Hamburg as the world's leading event for the on & offshore wind industry will market the new conference and exhibition to its global network."

- End -

About the Partners:

DN Media Group AS (RECHARGE)

The world's leading source of business information in renewable energy and official media partner of WindEnergy Hamburg. **Insight that matters:** with our core focus on the business of wind and power, RECHARGE delivers insight and breaking news in the most important industry of the world today: Renewable energy. Through breaking news, long read journalism and conferences and events, **RECHARGE' mission is to help industry leaders** take more informed decisions.

Hamburg Messe und Congress GmbH (WindEnergy Hamburg)

WindEnergy Hamburg, the world's leading wind industry fair, is the pivotal networking hub for experts, companies and investors from around the world: in eleven exhibition halls on the Hamburg Messe und Congress GmbH campus, right in the heart of the vibrant northern German port city, more than 1,600 companies from roughly 40 countries will present their innovations and solutions to 43,000 participants from around 100 different countries. Covering 80,000 m² of exhibition floor, equipment manufacturers and suppliers representing all stages of the onshore and offshore wind energy value chain will provide a comprehensive market overview. Featuring more than 300 renowned speakers on five open stages, this free conference programme is organised by the WindEnergy Hamburg team jointly with its partners, including the Global Wind Energy Council (GWEC), the European industry organisation WindEurope, the national industry associations VDMA and BWE, and leading industry media and enterprises.

Enterprise Singapore

Enterprise Singapore is the government agency championing enterprise development. We are a statutory board operating under the Ministry of Trade and Industry (MTI) of the Singapore government.

With a global network in over 35 locations around the world, we drive Singapore companies' global expansion while connecting international businesses to trusted partners in Singapore.

Singapore is a powerhouse of growth. As a global hub for trade and innovation, we offer access to a thriving ecosystem of global enterprises, startups, and investors. Known for their commitment to quality and innovation, Singapore companies are also ideal partners for growth.

Enterprise Singapore is here for wherever you're growing. Visit www.enterprisesg.gov.sg for more information.

Singapore Tourism Board

The Singapore Tourism Board (STB) is the lead development agency for tourism, one of Singapore's key economic sectors. Together with industry partners and the community, we shape a dynamic Singapore tourism landscape. We bring the Passion Made Possible brand to life by differentiating Singapore as a vibrant destination that inspires people to share and deepen their passions.

Annex: Quotes from offshore wind players

Cyan Renewables

Keng Lin Lee, Chief Executive Officer

"Singapore's world-class maritime ecosystem has made it a strategic base for global offshore wind players seeking to capture opportunities across the Asia-Pacific region. With its strong marine engineering capabilities, culture of innovation and environment conducive to innovation and investment, Singapore provides an ideal platform for collaboration and project execution within the APAC region's growing offshore wind sector.

As an international maritime hub with advanced port infrastructure and extensive global connectivity, Singapore is uniquely positioned to help alleviate supply chain bottlenecks faced by the offshore wind industry – facilitating efficient logistics, vessel support services and timely deployment across regional projects.

As a global pioneer in offshore wind vessel and subsea services, Singapore headquartered Cyan Renewables is well-positioned to support offshore wind developments in the APAC region from concept to installation – delivering safe, efficient and sustainable solutions. The outlook for offshore wind in the APAC region is highly promising, and Singapore as a key maritime hub will play a pivotal role in advancing the region's transition to a cleaner energy future."

About Cyan Renewables

Cyan Renewables is a pioneer in global offshore wind vessel operations, supporting the world's transition to a greener future. Established in 2022 and led by a team of industry veterans, Cyan has grown rapidly to become the largest offshore wind focused vessel platform in the APAC region, with operations and offices across Asia, Europe and Australia. With a fleet of 34 vessels and an extensive track record in the offshore wind industry, Cyan is capable of supporting every phase of offshore wind farm development and is well-positioned to rapidly adapt to evolving market conditions in order to meet the diverse needs of our clients. Cyan also offers a suite of blue solutions, from engineered reefs to fisheries protection, ensuring marine ecosystems thrive alongside renewable energy development. Where blue meets green, we integrate the protection of marine ecosystems with offshore wind development, driving a sustainable transition that balances environmental responsibility with green energy. Cyan Renewables is a portfolio company of [Seraya Partners](#).

Ramboll

Tim Fischer, Executive Director, Global Wind Division

"APAC represents the next bound of growth for the global offshore wind industry, and Singapore is uniquely positioned to play a key role in this transformation. With its strong supplier base and strategic location, the region is set to become a powerhouse - driving local development and supplying global markets. We are proud to support the future offshore wind conference in Singapore, in our view anchored at the right central point of the region, where we are also happy to operate our APAC headquarters."

About Ramboll

Ramboll is a global architecture, engineering, and consultancy company, delivering expertise and sustainable solutions. Founded in Denmark in 1945, Ramboll today operates globally and employs 18,000 experts. We combine deep local insight and experience with a global knowledge base to create sustainable societies and drive positive change for our clients.

Based on more than 35 years of experience in the wind industry, we offer a full range of services that cover the entire life cycle of a wind farm, from planning and project development to design, procurement, implementation, operation & maintenance, and decommissioning. Our interdisciplinary team of more than 900 off- and onshore wind experts are at the forefront of innovative energy solutions, offering a breadth of experience in both established technology and emerging concepts. Our portfolio includes the successful completion of off- and onshore wind projects in more than 60 countries.

Seatrium Limited

Samuel Wong, Executive Vice President, Fixed Platforms, Seatrium

“Headquartered in Singapore and building on more than six decades of engineering excellence, Seatrium is a trusted partner in offshore wind and a critical enabler of the global energy transition and energy security. We are on track to deliver about 14GW of offshore wind transmission assets for Europe and Asia - underscoring our proven track record and strong project management capabilities. Through our One Seatrium Global Delivery model, we harness the full strength of our global footprint and integrated resources to take on more projects and scale with the industry’s growth. We will continue to leverage Singapore’s strategic position and our commitment to innovation to deliver sustainable solutions that accelerate clean energy adoption while strengthening energy resilience worldwide.”

About Seatrium Limited

Seatrium Limited provides innovative engineering solutions to the global offshore, marine and energy industries. Headquartered in Singapore, the Group has over 60 years of track record in the design and construction of rigs, floaters, offshore platforms and specialised vessels, as well as in the repair, upgrading and conversion of different ship types. The Group’s key business segments include Oil & Gas Newbuilds and Conversions, Offshore Renewables, Repairs & Upgrades, and New Energies, with a growing focus on sustainable solutions to advance the global energy transition and maritime decarbonisation. As a premier global player offering offshore renewables, new energies and cleaner offshore & marine solutions, Seatrium is committed to delivering high standards of safety, quality and performance to its customers which include major energy companies, vessel owners and operators, shipping companies, and cruise and ferry operators. Seatrium operates shipyards, engineering & technology centres and facilities in Singapore, Brazil, China, India, Indonesia, Japan, Malaysia, the Philippines, Norway, Saudi Arabia, the United Arab Emirates, the United Kingdom and the United States.
