

FACTSHEET ON PROFESSIONAL CONVERSION PROGRAMME

Professional Conversion Programmes (PCPs) are career conversion programmes targeted at Professionals, Managers, Executives and Technicians (PMETs), including mid-career switchers, to undergo skills conversion and move into new occupations or sectors that have good prospects and opportunities for progression.

Types of PCPs:

- **Place-and-Train:** PMET is hired by a participating employer before undergoing training to take on new job role
- **[New] Attach-and-Train:** PMET is provided with training and work attachments, in advance of job placement, through industry partners in growth sectors with good future job opportunities.

The duration of the PCPs typically ranges from three months to 24 months, depending on the programme and job requirements.

2) Benefits of PCPs

3) Coverage of PCPs

There are currently over 50 PCPs across more than 20 sectors including Information and Communications Technology, Healthcare, Logistics, Food & Beverage, Biologics Manufacturing, and Early Childhood Care & Education. PCPs will continue to be ramped up and launched in more sectors, to assist more PMETs to embark on career conversion.

To better respond to industry manpower needs, PMETs who are keen to embark on a career switch do not necessarily have to join a new sector but can participate in PCPs that move them into new job roles within the same sector.

The types of training that PMETs have to undergo under the PCPs are broadly summarised in Table 1.
